

KEERTHI N

Senior .NET / Full-Stack Developer | Azure & AI Application Development

Bangalore, India | +91-9663667076 | Keerthi.neory@gmail.com | linkedin.com/in/keerthi-neory

PROFESSIONAL SUMMARY

9+ years of software development experience across .NET, web, desktop, mobile, Python, and AI-enabled applications. Strong hands-on background in C#, ASP.NET MVC, Web API, SQL Server, Entity Framework, Windows Forms, REST APIs, and SDLC delivery. Recent experience includes Generative AI application development using local LLMs, Ollama, Python/FastAPI, RAG, NL2SQL, MCP-based services, model orchestration, and real-time streaming. Currently expanding expertise in Microsoft Azure, Azure DevOps, CI/CD, cloud application deployment, and modern React-based full-stack development, with a focus on building secure, scalable .NET and AI solutions.

CORE TECHNICAL SKILLS

Backend / .NET	C#, .NET, ASP.NET MVC, Web API, REST APIs, ADO.NET, Entity Framework, LINQ to SQL, WCF, XML
Frontend	HTML5, CSS, Bootstrap, JavaScript, jQuery, AJAX; React (currently upskilling)
Cloud & DevOps	Microsoft Azure (currently upskilling), Azure DevOps, CI/CD concepts, cloud deployment concepts, Git/GitHub, Bitbucket
AI / GenAI	Generative AI, Local LLMs, Ollama, RAG, NL2SQL, MCP, model orchestration, Python, FastAPI
Languages	C#, Python, Java, Swift, T-SQL, VB.NET
Databases	Microsoft SQL Server (2008/2019), MySQL, SQLite
Applications	Web, Windows Forms, .NET MAUI, Android (Java), iOS (Swift), REST services
Reporting / Tools	Crystal Reports, Visual Studio, VS Code, Android Studio, Xcode, PyCharm

PROFESSIONAL EXPERIENCE

Senior Software Engineer | D2L Pharma Research Solutions Pvt. Ltd.

January 2023 – Present

- Develop .NET and AI-enabled applications across web, desktop, API, and data-processing workloads.
- Built the EnKEY Platform generative AI desktop application using .NET MAUI, Python/FastAPI, Ollama, SQL Server, and REST APIs.
- Developed an MCP Server supporting RAG, NL2SQL, model orchestration, SQL retrieval, web search, chat history, and model comparison.
- Implemented real-time AI response streaming, multi-model selection, model routing, and local LLM integration for offline inference.
- Participate across requirements, design, implementation, testing, deployment, troubleshooting, and production support.

Consultant | Grant Thornton India LLP

February 2021 – July 2022

- Contributed to enterprise application development, maintenance, troubleshooting, and delivery activities using Microsoft technologies.
- Worked across application development and database-related tasks in collaboration with project and business teams.

Software Engineer | Neory Technologies Pvt. Ltd.

March 2016 – November 2020

- Developed and maintained web, desktop, mobile, API, reporting, and database applications for multiple client projects.
- Worked with ASP.NET MVC, C#, VB.NET, Web API, SQL Server, Entity Framework, Crystal Reports, Android, and iOS.
- Handled requirements, development, integration, testing, deployment support, production troubleshooting, and performance improvements.

KEY PROJECTS

EnKEY Platform — Client: D2L Pharma

.NET MAUI, Python/FastAPI, Ollama, SQL Server, REST APIs

- Built a generative AI desktop application with chat UI, multi-model selection, real-time streaming, RAG, NL2SQL, MCP services, local LLM inference, model routing, chat history, and model comparison.

ORION — Client: Medtronic

ASP.NET MVC, C#, Web API, SQL Server, Android (Java), iOS (Swift)

- Developed expert-management and reporting modules, REST APIs for mobile applications, RBAC and secure API authentication, and performance improvements; contributed to requirements, sprint planning, and deployments.

KOLECT 2.0 — Client: Medtronic

ASP.NET MVC, C#, Web API, SQL Server, Android, iOS

- Developed KOL profile management, segmentation and event modules; built mobile applications for real-time expert data access and integrated SQL Server with Entity Framework.

Police IT — State Crime Records Bureau, Karnataka

VB.NET, ASP.NET, T-SQL, Crystal Reports

- Developed and maintained modules covering crime, law & order, traffic, and training digitization; provided production support and troubleshooting.

Income Expenses — Vsan Infrastructures Pvt. Ltd.

C#, T-SQL, OLEDB

- Built a Windows application for real-estate income and expenditure, including registration, booking, EMI schedules, agreements, email notifications, and SQL stored procedures.

Sales & Inventory (POS ERP) — Vsan Mart / San Groups

VB.NET, Entity Framework, T-SQL, Crystal Reports

- Developed cashiering, product tracking, invoicing, barcode generation, stock management, and sales reporting modules.

School Management System — San Groups

VB.NET, SQL Server, Crystal Reports

- Built student, fee, attendance, and employee management modules with automated reporting.

NexCom — E-Commerce Web Application

ASP.NET MVC, WCF, Android/iOS integration

- Developed product catalog, search/filtering, size-chart features, and WCF services for mobile integration.

CURRENT UPSKILLING FOCUS

- Microsoft Azure: Azure App Service, Azure SQL, Storage, Key Vault, Azure DevOps, CI/CD pipelines, application deployment, monitoring, and cloud fundamentals.
- Modern .NET: ASP.NET Core Web API, Clean Architecture, dependency injection, authentication/authorization, API design, testing, and scalable application patterns.
- AI / GenAI: RAG, LLM integration, prompt engineering, embeddings/vector search concepts, MCP, AI-enabled APIs, and production-oriented AI application patterns.
- Frontend: React and modern JavaScript/TypeScript fundamentals for full-stack development.

EDUCATION

Bachelor of Engineering – Electrical & Electronics Engineering

GATES Institute of Technology, Gooty, Anantapur, Andhra Pradesh | 2015 | 63.4%

PROFESSIONAL STRENGTHS

Full SDLC ownership • Requirements & analysis • Solution development • API integration • Database development • Production support • Troubleshooting • Performance optimization • Cross-platform application development • AI application integration
